

Hydrant Hat L.L.C.
P.O.Box 278
Ashtabula, Ohio 44004

P R E S S R E L E A S E

The Hydrant Hat™ is constructed of polyethylene to provide years of maintenance free service.

When placed over a hydrant or post indicator valve provides a “protective bubble” from the surrounding atmosphere to prevent corrosion. The patented “flexible finger” base holds it securely in place.

Fulfills OSHA 1910.160(b)(12) “The employer shall assure that all systems installed in the presence of corrosive atmospheres are constructed of non-corrosive material or otherwise protected against corrosion.”
